

# MODULE DESCRIPTION FORM

Module Information			
Module Title	Programming Basics		Module Delivery
Module Type	C		<input checked="" type="checkbox"/> Theory <input checked="" type="checkbox"/> Lecture <input checked="" type="checkbox"/> Lab <input checked="" type="checkbox"/> Tutorial <input checked="" type="checkbox"/> Practical <input type="checkbox"/> Seminar
Module Code	AI1102		
ECTS Credits	9		
SWL (hr/sem)	225		
Module Level	1	Semester of Delivery	
Administering Department	Artificial Intelligence	College	Computer Science and Information Technology
Module Leader	Abdulkareem Zwaen	e-mail	<a href="mailto:abdulkareem.zouine@uowa.edu.iq">abdulkareem.zouine@uowa.edu.iq</a>
Module Leader's Acad. Title	Lecturer	Module Leader's Qualification	Ph.D.
Module Tutor	Abdulkareem Zwaen	e-mail	<a href="mailto:abdulkareem.zouine@uowa.edu.iq">abdulkareem.zouine@uowa.edu.iq</a>
Peer Reviewer Name	Ali Mahmoud Ali	e-mail	<a href="mailto:ali.mahmoud@uowa.edu.iq">ali.mahmoud@uowa.edu.iq</a>
Scientific Committee Approval Date	01/11/2025	Version Number	1.0

Relation with other Modules			
Prerequisite module	None	Semester	-
Co-requisites module	None	Semester	-

  
م.م. عابد محمود علي  
مقر قسم الذكاء الاصطناعي  
٢٠٢٦ - ٢٠٢٥

Department Head Approval

  
ا.م.د. صبيح محمد علي لافانسي  
العميد  
٢٠٢٦ - ٢٠٢٥

Dean of the College Approval

## Module Aims, Learning Outcomes and Indicative Contents

<b>Module Objectives</b>	<p>The objectives of this module are to:</p> <ol style="list-style-type: none"> <li>1. Introduce students to fundamental programming concepts and problem-solving techniques using the C++ programming language.</li> <li>2. Develop students' understanding of programming paradigms, with emphasis on the imperative approach and foundational functional concepts.</li> <li>3. Enable students to understand and apply core C++ language features, including variables, data types, operators, control structures, and loops.</li> <li>4. Build a foundational understanding of object-oriented programming concepts and their implementation in C++.</li> <li>5. Strengthen students' ability to analyze computational problems and design efficient, structured C++ solutions.</li> <li>6. Prepare students to develop, test, and debug basic C++ applications using standard libraries and best programming practices.</li> </ol>
<b>Module Learning Outcomes</b>	<p>By the end of this module, students will be able to:</p> <ol style="list-style-type: none"> <li>1. Explain the fundamental concepts and terminology associated with programming languages, with emphasis on imperative and functional programming paradigms.</li> <li>2. Apply core C++ programming constructs, including variables, data types, operators, control structures, and loops, to develop correct programs.</li> <li>3. Use standard C++ libraries to perform input/output operations and basic mathematical computations.</li> <li>4. Design and implement object-oriented programs using key OOP principles such as encapsulation and modularity.</li> <li>5. Analyze and solve computational problems by applying structured and functional programming techniques.</li> <li>6. Develop, test, and debug C++ programs using appropriate programming practices and logical reasoning.</li> </ol>
<b>Indicative Contents</b>	<ul style="list-style-type: none"> <li>• Introduction to algorithms and problem-solving techniques</li> <li>• Overview of programming languages and programming paradigms</li> <li>• Introduction to C++ programming environment and syntax</li> <li>• Variables, data types, and user input/output in C++</li> <li>• Operators, expressions, and logical conditions</li> <li>• Control structures: if, switch, and decision making</li> </ul>

	<ul style="list-style-type: none"> <li>• Looping structures: while, do-while, and for loops</li> <li>• Strings, Boolean values, and mathematical operations in C++</li> <li>• C++ standard libraries and basic program organization</li> <li>• Object-oriented programming concepts in C++</li> <li>• Program testing, debugging, and code optimization</li> <li>• Development of simple C++ applications</li> </ul>
--	--

<b>Learning and Teaching Strategies</b>	
<b>Strategies</b>	<ol style="list-style-type: none"> <li>1. <b>Lectures</b> Core programming concepts, syntax, and paradigms are introduced through structured lectures, providing students with a solid theoretical foundation in C++ programming and problem-solving techniques.</li> <li>2. <b>Guided Practical Sessions</b> Hands-on programming exercises are used to reinforce lecture material, allowing students to practice coding, experiment with language constructs, and gain confidence in writing C++ programs.</li> <li>3. <b>Problem-Based Learning</b> Students are engaged in solving progressively complex programming problems that promote analytical thinking, algorithmic reasoning, and the application of imperative and functional programming concepts.</li> <li>4. <b>Demonstrations and Code Walkthroughs</b> Live demonstrations and step-by-step code walkthroughs are employed to illustrate program logic, control flow, and debugging techniques.</li> <li>5. <b>Independent Learning</b> Students are encouraged to explore additional programming examples, documentation, and online resources to strengthen self-learning skills and technical competence.</li> <li>6. <b>Continuous Feedback and Assessment</b> Regular quizzes, assignments, and practical tasks provide formative feedback, enabling students to identify strengths and areas for improvement throughout the semester.</li> <li>7. <b>Revision and Exam Preparation Sessions</b> Dedicated sessions are conducted to review key concepts, clarify common misconceptions, and prepare students for midterm and final examinations.</li> </ol>

<b>Student Workload (SWL)</b>			
<b>Structured SWL (h/sem)</b>	90	<b>Structured SWL (h/w)</b>	6
<b>Unstructured SWL (h/sem)</b>	135	<b>Unstructured SWL (h/w)</b>	9
<b>Total SWL (h/sem)</b>	<b>225</b>		

<b>Module Evaluation</b>					
		<b>Time/Number</b>	<b>Weight (Marks)</b>	<b>Week Due</b>	<b>Relevant Learning Outcome</b>
<b>Formative assessment</b>	<b>Quizzes</b>	5	10% (10)	2,4,6,8,11	LO #1, LO #2, LO #10, LO #11
	<b>Assignments</b>	5	10% (10)	2,3,5,9,12	LO #3, LO #4, LO #6, LO #7
	<b>Projects / Lab.</b>	10	10% (10)	Continuous	All Learning Outcomes
	<b>Report</b>	1	10% (10)	13	LO #5, LO #8, LO #10
<b>Summative assessment</b>	<b>Midterm Exam</b>	2hr	10% (10)	7	LO #1 – LO #7
	<b>Final Exam</b>	3hr	50% (50)	16	All Learning Outcomes
<b>Total assessment</b>			<b>100% (100 Marks)</b>		

## Delivery Plan (Weekly Syllabus)

	Material Covered
Week 1	Algorithms
Week 2	Introduction to programming languages and C++
Week 3	Variables
Week 4	C++ Libraries
Week 5	C++ User Input
Week 6	C++ Operators
Week 7	Mid-term Exam
Week 8	C++ Strings & C++ Math
Week 9	C++ Booleans
Week 10	If condition
Week 11	Switch condition
Week 12	While loop
Week 13	Do-while loop
Week 14	For loop
Week 15	C++ Break and Continue
Week 16	Preparatory week before the final Exam

### Delivery Plan (Weekly Lab. Syllabus)

	Material Covered
Week 1	C++ Libraries
Week 2	C++ User Input
Week 3	C++ Operators
Week 4	If condition
Week 5	Switch condition
Week 6	While loop
Week 7	Do-while loop
Week 8	For loop
Week 9	C++ Break and Continue

### Learning and Teaching Resources

	Text	Available in the Library?
Required Texts	The C++ Programming Language (4th Edition) by Bjarne Stroustrup	No
Recommended Texts	<b>Stroustrup, B.</b> (2013). <i>The C++ Programming Language</i> (4th ed.). <b>Deitel, P., &amp; Deitel, H.</b> (2020). <i>C++ How to Program</i> (10th ed.).	
Websites	<a href="https://www.learncpp.com">https://www.learncpp.com</a> <a href="https://www.w3schools.com/CPP/default.asp">https://www.w3schools.com/CPP/default.asp</a>	

## Grading Scheme

Group	Grade	Mark	Marks %	Definition
<b>Success Group (50 - 100)</b>	<b>A</b> - Excellent	Excellent	90 - 100	Outstanding Performance
	<b>B</b> - Very Good	Very Good	80 - 89	Above average with some errors
	<b>C</b> - Good	Good	70 - 79	Sound work with notable errors
	<b>D</b> - Satisfactory	Fair / Average	60 - 69	Fair but with major shortcomings
	<b>E</b> - Sufficient	Pass / Acceptable	50 - 59	Work meets minimum criteria
<b>Fail Group (0 – 49)</b>	<b>FX</b> – Fail	Fail (Pending)	(45-49)	More work required but credit awarded
	<b>F</b> – Fail	Fail	(0-44)	Considerable amount of work required

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.
